I]

Bug: Empty note appending in notes [ ].

Approach to Debug: Add if condition to check if note is empty or not. If non empty then only append it to notes [ ].

II]

Bug: Method not allowed as post doesn't view webpage directly.

Approach to Debug: Added GET method too to make the webpage visible and if request is POST then to add note.

III]

Bug: The form action attribute in home.html is empty which means that the form will submit to the same URL.

Approach to Debug: Form action attribute is set to "/" which is the URL that handles the form submission in app.py i.e., Flask app.

IV]

Bug: Button has no 'type' attribute to make it submit button.

Approach to Debug: Add type = submit to make it a submit button.
